2. The following is an examiner's statement of reasons for allowance:

Regarding claim 18, the prior art fails to disclose or make obvious a illumination system for illuminating an SPR sensor surface having formed therein a conducting layer, the illumination system having a two dimensional array of light sources; a collimator the directs light from each light source in a collimated beam of substantially parallel light rays so that the light is incident on the sensor surface, and in combination with the other recited limitations of claim 18. Claims 19-25, 45-47 are allowed by the virtue of dependency on the allowed claim 18.

Regarding claim 48, the prior art fails to disclose or make obvious an illumination system for illuminating an SPR sensor surface having formed therein a conducting layer, the illumination system having an array of light sources; a collimator that directs light from each light source in a collimated beam of substantially parallel light rays so that the light is incident on the sensor surface, wherein light sources in at least a subset of light sources in the subset is incident on the sensor surface at substantially different incident angles, and in combination with the other recited limitations of claim 48. Claims 49-50 are allowed by the virtue of dependency on the allowed claim 48.
